

Year 9: Reproduction

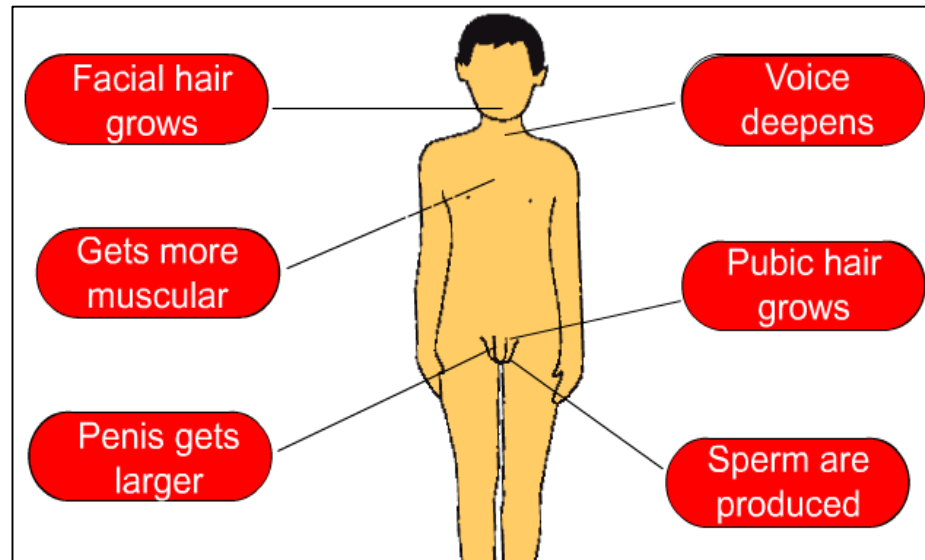

Reproductive organs

Puberty: time when sexual maturity happens.
 Puberty in females usually starts around the age of 11.

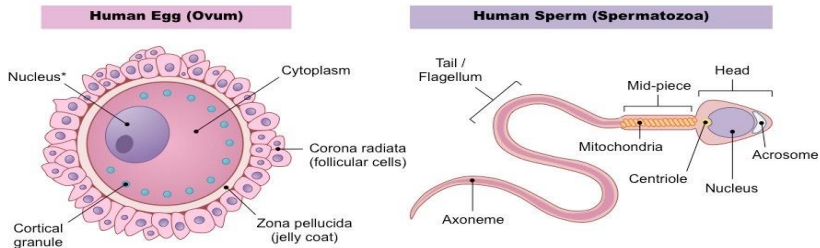

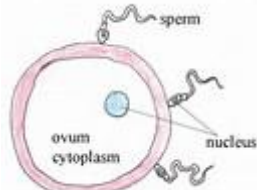

Puberty in males usually starts around the age of 12

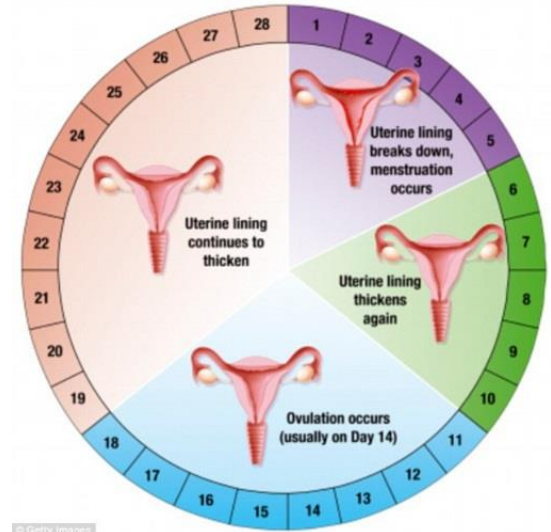

Fertilisation and gametes

Fertilisation: when the sperm and egg join.

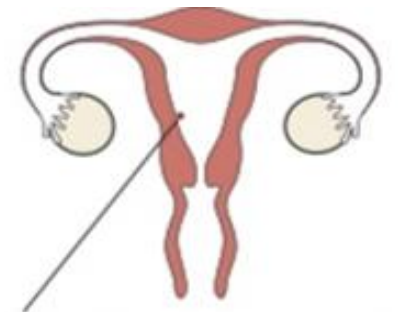

The Menstrual Cycle

Women have a period every ~28 days.

Implantation: when the embryo attaches to the wall of the uterus.

The fertilised egg travels down the oviduct and implants in the uterus.
