

The concept of this work based curriculum is to offer a structured programme of study based on separate units of work that will be internally assessed over a period of up to 4 years. The curriculum is designed to be challenging in respect of individual needs, targets and achievements. This work based curriculum will build on the achievements that the pupils have already made within the KS3 Vocational Skills curriculum providing opportunities for pupils to further develop their work based skills. Pupils will work through different assessment opportunities including real life job sheets that are created to offer pupils an opportunity to experience different work scenarios within the vocational areas that we have in school. These work related learning opportunities, within a range of sectors, are designed to develop work skills and work ethics that can be transferred to almost every role within any workplace.

We aim to offer pupils enough opportunities within the work based curriculum so as to embed employability skills, making youngsters workplace ready for their future, allowing them to make more informed choices when they leave Combe Pafford School.

This curriculum is designed to be progressive from **Step 1** through to **Step 4**.

**This curriculum is internally assessed. There is no external qualification.**

Steps	Examples of our core units. These units are mandatory	Examples of our optional unit
